

Evaluate Stage

Criterion E

Term 3 SY 2010-2011

Name: _____

Class: **7** _____

Design is Criterion B of MYP Technology.

Work you do for this criterion leads to the preparation of a range of design for the product.

You have met with your group to review your approved Design Brief and Design Specifications. Then, you have individually sketched or drawn different design ideas **for** your product. Design Drafts/ideas are sample outlines or concept maps that you picture your product to look like.

We're done with this stage, now we start evaluating!

How well did/have you **PRESENT THE RANGE OF DESIGNS, CHOOSE THE FINAL DESIGN AND JUSTIFIED IT:**

(discuss your performance during this stage of the design cycle)

☐ I have evaluated each design idea fully against the design specification, point by point.

My evidence that I have done this/these is/are: *(if I haven't done so, my reason/s for not doing this/these is/are..)*

☐ I have used the results of the evaluation above, and other factors, to justify my chosen design.

My evidence that I have done this/these is/are: *(if I haven't done so, my reason/s for not doing this/these is/are..)*

☐ I have included good quality labeled drawings/layouts of my different design ideas.

My evidence that I have done this/these is/are: *(if I haven't done so, my reason/s for not doing this/these is/are..)*

☐ I have come up with a variety (at least 3) of *different* design ideas.

My evidence that I have done this/these is/are: *(if I haven't done so, my reason/s for not doing this/these is/are..)*

☐ I have gotten feedback from my teacher if I am unclear on any part of making the design.

My evidence that I have done this/these is/are: *(if I haven't done so, my reason/s for not doing this/these is/are..)*
